

# Industrial Software Development (ISDe) – January 18, 2021

Name: ..... Surname: ..... Student ID: .....

## Exercise 1 (5 points) – 20 mins

1. Please describe in a concise manner the main aspects of the Scrum methodology.
2. Describe the main steps of the *Waterfall* programming paradigm. Is it appropriate for projects in which the customers' requirements can change over time? Why?
3. What are issues on Git projects? What are they used for? Discuss the steps needed to address an issue in a project and integrate the corresponding changes.
